

SpaceTech is a growing medium-size enterprise focused on the development of space systems, from small satellites and optical instruments to satellite equipment like solar arrays, mechanisms and electronics. From our headquarters in Immenstaad at Lake Constance, Germany, we offer international customers our products and services for their space missions.

Your opportunity to make a difference

We are developing challenging laser-optical and quantum-optical instruments for space. Our optical instruments are part of gravity and trace gas missions for climate research, fundamental science and navigation.

Space Instrument Project Manager (m/f/d) in the domain of Laser/Quantum Optics

Your Tasks

- Responsibility for performance, schedule, financial budget, and quality of a two- to three-digit Million Euro Project with a space agency as customer
- Be an active and integral part of the engineering team; dedicated expertise in at least one engineering discipline.
- Management of a diverse project team of highly skilled experts from different space engineering and physics fields
- End-to-end responsibility for technical management and procurement
- Interface with institutional customer and subsystem / component suppliers
- Creation of a framework and atmosphere which allows efficient, team-oriented and customer focused project execution

Your Skills and Experience

- Experience in space project management with institutional customers
- Knowledge of all aspects of space project life cycle from design development and procurement to AIT
- Knowledge of European Space Standards (ECSS)
- Background in Space Engineering, Space Instrument, Physics or similar
- Multiple years of engineering experience in space project development and execution
- Knowledge of industrial cost and schedule structures
- Experience in risk management of complex systems
- Strong drive to deliver projects on cost, on time and on quality
- Behavioral skills including result orientation, operational efficiency, fostering Teamgeist, continuous improvement, persistence, forward thinking

Our offer

- High profile management position with high visibility
- Opportunity for personal impact and development possibilities in flat company hierarchies
- A pleasant working atmosphere in a young team of interdisciplinary space enthusiasts
- Profit sharing, company pension scheme, flexible home office rules and much more...
- Living and working in an area of great natural beauty and safety offering a large variety of leisure activities

This position will require being eligible for clearance by the recognized authorities.
