Work Completion Certificate

Korean Airlines Co. Ltd certifies that the company SpaceTech GmbH, located in Immenstaad, Germany, has developed the Solar Array Deployment Mechanism (SADM) for the Korean satellite Kompsat-3.

The development including qualification and acceptance tests has been successfully performed by SpaceTech. The Flight Models of the Deployment Mechanism have been delivered in line with the schedule and according to the requirements.

We congratulate SpaceTech to this success and thank the project team for the professional work performed.
